PROFESSIONAL PROFILE

I am a coding enthusiast looking for an opportunity in an esteemed organisation where I can utilise my skills and enhance the learning in my field of work. I am a creative, sharp-minded person with leadership & coaching skills, possessing strong time-management skills and work ethics. Looking forward to master new technologies.

PROJECTS

- **Calculator** - A basic calculator app designed in **KOTLIN Language** for simple arithmetic calculations. The app interface consisting of a calculator display screen and a set of buttons that correspond to the various mathematical operations.
- **Counter App** - A simple application written in **KOTLIN Language** that allows the user to count things, having a straight forward interface displaying the current count.
- **Xander AI** - A **Python** based personal assistant designed to engage in natural language conversations with users through voice input and output. It combines speech recognition, text-to-speech conversion, web browsing, and artificial intelligence capabilities to provide a range of functionalities.
- **Portfolio Website** - This is my personal portfolio website created using **HTML, CSS, and JavaScript**. It showcases my projects, skills, and experiences, serving as an online representation of my work and providing a platform to highlight my abilities and accomplishments.
- **Netflix Clone** - This is a Netflix clone website that replicates the look and feel of the official Netflix login page written using **HTML and CSS**. It serves as a demonstration and educational project to showcase web development skills and techniques.
- **Weather Zen** - This innovative web application offers you the latest weather updates with a clean and intuitive interface.

WORK EXPERIENCE

- **College Tips** - Dealt with Marketing and Advertising materials, Improving the user interface of certain websites, enhancing and creating Social Media graphics, Visual Identity and Branding for the company and other organisations as well.
- **Tech Mahindra** - At Tech Mahindra, I led a critical project to design and implement an intuitive web-based application. This dynamic tool enabled users to easily manage head counts for multiple clients, streamlining operations and improving overall efficiency. This hands-on experience not only honed my technical skills but also enriched my grasp of user-centric web development in a professional environment.
